

LAVA will be exhibiting at CeBIT Hannover again this year!

CeBIT is the most important IT fair worldwide, and we don't want to miss the opportunity to show you our products. If you are planning to be there you can arrange a meeting with us by sending an email to johnb@lavalink.com or bobf@lavalink.com.

This year at CeBIT we will be showing new USB 3.0 products in addition to our serial and parallel ports. Be sure to drop by our location in the Ontario Telecom Pavilion, Hall 13, Stand D28.

LAVA: The Source for Ports

LAVA Computer MFG Inc, headquartered in Toronto, Canada designs and manufactures serial and parallel I/O boards, Ethernet-to-serial device servers, USB-to-serial interfaces, and IP-based cash register polling hardware that is widely used in the Point of Sale, Kiosk, Gaming, Light Industrial Automation, Security and Access Control industries. With well over a million LAVA products built into workstations, servers, retail POS systems, and industrial computers since 1984, LAVA I/O interface boards and devices are trusted by resellers, distributors, OEMs, and system builders in over 47 countries worldwide. Designed for lifetime performance, each LAVA connectivity link is individually tested and covered by the LAVA Lifetime Warranty. Visit <http://www.lavalink.com>.
