Installation and Specifications

USB 2.0 Hard Drive Enclosure for IDE drives

- The Kazan Hard Drive Enclosure ships complete with a USB 2.0 to IDE controller card, a switching power supply, one IDE cable, one USB cable, and (North America only) a power supply cable (IDE hard drive purchased separately).
- Note: 7200 RPM drives are recommended for maximum throughput.
- FAST – USB 2.0 speed
- Ideal for external storage applications
- USB 2.0, EHCI, OHCI compatible
- Compatible with ATA/ATAPI (IDE) hard drive

1. Connect the IDE cable and internal power cable to the hard drive. Insert the IDE hard drive into the Kazan enclosure.
2. Replace the Kazan enclosure cover and secure it with four screws.
3. Connect a power cable to your assembled drive, and plug into any wall outlet.
4. Finally, attach the supplied USB cable to your computer's USB port (USB 2.0 recommended).
